Table 1: MoM and YoY % change in hotel price indices (August 2026)

1 Results are based on collecting standard double room prices of 3-, 4-, 5-star hotels and guesthouses across 10 Georgian regions and Tbilisi, using a stratified sample of 568 3-, 4-, 5-star hotels and 371 guesthouses from booking.com. Average prices are arithmetic means of available hotels in current period.

2 Guesthouse: a type of accommodation, characterized by having a small number of rooms, where services are usually offered by the resident family.

3 The hotel price index is calculated based on available hotels in current and base period, using Consumer Price Index methodology as outlined in the 2004 Consumer Price Index

Manual and the 2009 Practical Guide.

4 Index values are not shown for regions with missing base-period data or very small samples. However, all observations are included in the total regional index.
